FUNERAL OF EMERA KINNEAR

LARGE CROWD ATTENDS SERVICES AND PAY LAST RESPECTS TO YOUNG FRIEND

COFFIN BANKED WITH FLOWERS

Death Came Last Wednesday After Long Illness and Serious Operation.

Emera Mills Kinnear, son of Mr. and Mrs. W. L. Kinnear, died last Wednesday, after a long illness, resulting from a tumor on the brain.

The funeral services were held Friday afternoon at the Union church and were conducted by Rev. W. S. Walker. The church was crowded with the many friends of the deceased and his family who came to pay their last respects to the dead. Many beautiful floral designs and great clusters of cut flowers were banked about and on the coffin. Members of the Knights of Pythias lodge attended the funeral in a body.

Rev. Walker spoke of the life and influence for good of the deceased and spoke words of comfort to the mourners. Several hymns were sung by the choir.

The deceased was born July 7, 1896 in this city and has lived here all this time with the exception of a few months when he attended school in

Spokane. He is survived by his parents, two brothers, Harry B. Kinnear and Wm. F. Kinnear, and a sister, Mrs. H. O. Jackson.

Among the out-of-town mourners at the funeral were Henry Repp and John Repp, of Endicott, Wash., brothers of Mrs. W. L. Kinnear.

The pallbearers were former schoolmates and friends of the deceased: Eugene Campbell, Oliver Campbell, Fred Stoos, Jack Macnamara, Reuben Boileau and Al Bruce.

Emera Kinnear was a young man of pleasing personality and sterling qualities. He was unselfish; had a smile and good word for all and was always anxious to help a friend or acquaintance. He went through many years of his life handicapped by the growth which caused him great pain at times and eventually resulted in his death. He bore up under his misfortune with greatest fortitude and courage. He had suffered more or less for the past three years from brain tumor and has been under the care of many first-class surgeons and doctors. He was under the care of the Mayo's for four months and later was placed in the John Hopkins hospital under the care of Dr. W. E. Dandy, who on June 1, made an exploratory operation and June 22 made a final and successful operation in removing the tumor. All was promising for a speedy and complete recovery until upon careful examination of the tumor it was discovered that it was tubercular and then it was decided to return home and await developments, there being a chance that Emera might recover. He did not, however, regain his strength and gradually became weaker and weaker. The end came very quietly and peacefully.
